

Bean2Baby User Journey

-  = These are the possible deliverables for this Bean2Baby idea.
-  This idea has 3 potential components:
A) open-source website, B) printables and C) app.
They can be developed together or separately depending upon feasibility. All are centered on the Prenatal-through-postnatal To-do List concept.

Researching (nutrition, exercise, healthcare, medicine, insurance and more) and retaining relevant knowledge for when it is most needed can consume a lot of mental energy throughout pregnancy and new parenthood.
